Our approach is to make interiors timeless. It doesn't matter what year it is, 2022, 1980 or 2040, this space is always harmonious.

Simple base, authentic décor, cosiness, calmness, home feeling and aesthetic simplicity.

Such an interior needs only a cosmetic renovation every few years, and not a complete renovation of the next "modern style".

Recreation areas

In a tropical climate,

this area is a continuation of the living room. They are thought out both for individual and for rest in the company. Lay on the sun loungers, take a refreshing

Bedrooms

A place where everything is thought out so that you can rest and recharge. Thoughtful layout and proportions of rooms, soundproofing, air conditioning, different lighting modes, light and blackout curtains, a bathroom with showers, bathrooms, storage areas, a wardrobe with a large mirror, high-quality textiles and decor.

Kitchen

In the kitchen combined with the living room, in addition to beauty, we paid special attention to ergonomics and convenience. An experienced chef helped us with this: work surfaces, storage areas, lighting, a functional island, all necessary household appliances, aesthetic dishes and cutlery, built-in water filters and a sink shredder.

Bathroom

In the bathroom, we have provided comfortable sinks with a large mirror, day and night lighting, forced ventilation, storage places to preserve the aesthetics of the space, non-slip flooring, high-quality plumbing, faucets and a good water supply.
